End the US blockade on Cuba!

Demonstrate – Saturday Nov. 27

Cubans demonstrating support for the revolution on Nov 15

For 60 years the USA has enforced a vicious economic blockade against Cuba, aiming "*to bring about hunger, desperation and overthrow of government*," intensified by Trump with 243 new sanctions.

Pres. Biden has continued this policy, hoping to turn economic crisis into political crisis by funnelling millions of $$$ to "dissidents" to organise protests, destabilise Cuba and create conditions for direct intervention.

For months, the US State Dept and right-wing Cubans based in Miami have done all they could to incite Cubans to join anti-government protests planned for 15th November.

In a huge defeat for the US govt and its right-wing Cuban allies, these calls went unheeded. Instead of anti-government protests, Cuba was lit up

by grassroots demonstrations of support for the revolution and repudiation of the tiny groups trying to bring it down.

Boosting Cubans' morale, Cuba is the only developing country in the world to have developed its own highly-effective vaccines, and now leads the entire world in vaccine doses per capita! What's more, they're selling them at cost to other poor countries and sharing technology with them, in sharp contrast to the profiteering of big pharma in Europe and the USA.

US imperialism will respond to these setbacks with yet more aggression— *Cuba needs our solidarity more than ever!*

12:00 Sheffield Town Hall

Join us! Help us get Biden's knee off Cuba's neck!

UN Day of Solidarity with the Palestinians
Sat 27th November

Rally
11 am Sat 27th Nov.
Sheffield Town Hall
